Virtual Online Safety Training for Parents & Carers

During and since lockdown, everyone's reliance on technology has increased and we know that for many families **online safety is suddenly at the forefront of their everyday lives.**

To support parents and carers with managing the challenges of online life, Childnet will be hosting an information session:

'Supporting Young People Online'

Childnet is one of the UK's leading online safety charities, who work to create the internet a great and safe place for all young people. As part of the UK Safer Internet Centre, they are experts in the field of online safety education and work closely with government, the internet industry, adults and children.

They aim to equip parents and carers with the knowledge to protect their children online and empower them with practical advice to implement at home.

1-hour long session hosted via Zoom

Includes a 45 minute presentation

Additional time for questions, which can be asked throughout using the chat function.

Overall I found the session very helpful... useful signposting to other resources.

0

Very clear and easy to understand. Lots of information about the dangers and also where to get help.

excellent and have already recommended it to other parents.

Joining link will be sent out nearer the time.

Save the date: Thursday 6th
January 2022 7pm—8pm
