

27/1/2020

Dear Parents and Carers,

The governing body would like to endorse everything that the Head Teacher has said in today's communication regarding the Ofsted Inspection.

Whilst we cannot get away from the fact that the results in recent years have slipped, we as governors believe that the current leadership team at the school is addressing this head-on, working with her leadership team and the dedicated staff across the school.

A review of our internal data suggests that our SATS results this year should be setting us off in the right direction, but we also recognise that this is a journey with a lot more work to be done. The strategic development plans already in place evidence a drive for improvement across reading, writing and mathematics as well as consistency across all curriculum areas as we look to provide the best possible education for all our children.

We thank you for the positive feedback and incredible support submitted via the Ofsted questionnaire and the school commits to give you regular feedback on its progress against the plans that are in place to get us to where we should be as a school.

Best wishes

Linda Wells and Brian Howells
Co-Chair of Governors
on behalf of the Governing Body
